PERSONAL PROJECTS

FACE RECOGNITION ATTENDANCE SYSTEM (02/2021 - 10/2021)

- This is a Desktop Application Using Machine learning and Front End Tkinter. This Application detects the face of a person(Student) and recognizes and marks the Attendance.
- **Programming language:** Python, Tkinter.

ONLINE FOOD ORDERING SYSTEM (08/2020 - 03/2021)

- The Main Motive of this project is to build an User friendly and reliable system to delivery food on time.
- In this customer can view restaurants and thier respective menu's, Restaurant owners can update the menu at any time. When a customer orders an item and makes payment, should wait for restaurant confirmation of the order and then order will be delivered.
- **Programming language:** HTML, CSS, PHP & JAVASCRIPT.

HOME AUTOMATION USING ARDUINO (06/2019 - 11/2019)

- These Application employ automation intensely as they are preferred to be controlled by house owners. Where everything in the house can be managed by the owners at any time from anywhere.
