

Carrel Text+Image Fixture

This is page one of the mixed-content PDF fixture.

The pdf sentinel phrase is: palimpsest harbor.

Below, a PNG generated by the same fixture script is embedded
so pdfimages/extract-images tests have something to pull out.

Page Two: The Appendix

Page two exists so page-count, split, and per-page text tests have a second page to point at. It repeats no sentinel; it just sits here being reliably, deterministically boring.
