

```

using System;

namespace WebApplication14
{
    public partial class WebForm2 : System.Web.UI.Page
    {
        // A field to store the count
        int count;

        protected void Page_Load(object sender, EventArgs e)
        {
            if (!IsPostBack)
            {
                // Initialize count to 0 when the page is loaded for the first
time
                ViewState["count"] = 0;
            }

            protected void Button1_Click(object sender, EventArgs e)
            {
                // Retrieve the current count from ViewState
                count = (int)ViewState["count"];

                // Increment the count
                count++;

                // Store the updated count back to ViewState
                ViewState["count"] = count;

                // Update the label text to show the count
                Label1.Text = "Page submitted " + count + " times.";
            }
        }
    }
}

```
