

# Regular Example

## pdfbaker more realistic

This example demonstrates a more realistic use of **pdfbaker** with multiple pages and more complex styling. This document shows:

- Multiple pages with different layouts
- Template reuse across pages
- Header and footer elements
- Text formatting and styling
- Page numbers
- Image inclusion
- Highlighting inside text blocks

# Document Features

## Multiple Pages

Document may have multiple pages

## Template Reuse

Same template used by multiple pages

## Consistent Styling

Shared styles across pages

## Wrapping Long Text

SVG doesn't have text wrapping containers, but pdfbaker lets you store long text in config and use the wordwrap filter to split it into lines. Adjust `max_chars` to fit narrower spaces.

# Document Benefits

## Easy Configuration

Simple YAML-based configuration

## Flexible Templates

Full control over layout with SVG

## Image Support

Include and position images easily
