## 1 Introduction

The main Icelandic tagset was created in the making of the Icelandic Frequency Dictionary (*IFD*) corpus (Pind et al. 1991). Due to the morphological richness of the Icelandic language, the main tagset is large and makes fine distinctions compared to related languages. The rich inflections of an Icelandic word contribute more information about POS of surrounding words than is the case, for example, for English where word order is not as free. The tagset consists of 700 possible tags, 639 tags of which appear in the *IFD* corpus.

We can illustrate the preciseness of the tags by examining the semantics of a tag. Each character in the tag has a particular function. The first character denotes the word class. For each word class there is a predefined number of additional characters (at most six) which describe morphological features, like *gender*, *number* and *case* for nouns; *degree* and *declension* for adjectives; *voice*, *mood* and *tense* for verbs, etc.

Tables 1 and 2 show the semantics of the noun and the adjective tags, and the semantics of the verb tags, respectively. Consider, for example, the tag “*nken*”. The first letter, “*n*”, denotes the word class “*nafnorð*” (noun), the second letter, “*k*”, denotes the gender “*karlkyn*” (masculine), the third letter, “*e*”, denotes the number “*eintala*” (singular) and the last letter, “*n*”, denotes the case “*nefnifall*” (nominative case).

To give another example, consider the phrase “*fallegu hestarnir hoppuðu*” (the beautiful horses jumped). The corresponding tag for “*fallegu*” is “*lkenvf*”, denoting adjective, masculine, singular, nominative, weak declension, positive; the tag for “*hestarnir*” is “*nkfng*”,

denoting noun, masculine, plural, nominative with suffixed definite article, and the tag for “*hoppuðu*” is “*sfg3fb*”, denoting verb, indicative mood, active voice, 3-rd person, plural and past tense. Note the agreement in gender, number and case between the adjective and the noun, and the agreement in person and number between the adjective/noun and the verb.

A complete description of the tagset can be found in the Appendix A.
