seq in seq, seqDefault and seqReset

copied: 1, 2, 3. Reset. 1, 2, 3.

simple use of seq

First seq: 1
Second seq: 2

 We have just done a <seqReset/>

First seq after seqReset: 1
second seq after seqReset: 2

If you are going to use multiple seq tags, you need to use the "id" attribute.

Better use of seq

 We have just done a <seqDefault id="test"/>
 We have just done a <seqReset id="test"/>

First seq: 1
Second seq: 2

 We have just done a <seqReset id="test"/>

First seq after seqReset: 1
second seq after seqReset: 2

Using two seqs independently

 We have just done a <seqReset id="testOne"/>
 We have just done a <seqReset id="testTwo"/>

First seq for testOne: 1
Second seq for testOne: 2

First seq for testTwo: 1
Second seq for testTwo: 2

 We have just done a <seqReset id="testOne"/>

First seq after seqReset for testOne: 1
second seq after seqReset for testOne: 2

First seq after seqReset for testTwo: 3
second seq after seqReset for testTwo: 4

Notice how resetting testOne doesn't affect testTwo at all.
