

Sample results

Table 1 summarizes the measurements collected during the trial. Each row corresponds to one specimen; values are averaged over three independent runs.

Specimen	Length (mm)	Mass (g)	Yield (%)
The yield percentages increase monotonically with specimen length within each batch.			
A-101	12.4	3.51	88.2
Batch B shows systematically lower yields than batch A across all measured lengths.			
A-102	13.0	3.77	91.5
B-201	9.8	2.44	76.0
B-202	10.2	2.60	79.8
