German A2

TOOLS

Python, Rust, Go
Kubernetes, Triton
vLLM, Prometheus
Terraform, ArgoCD

PROFILE

Platform engineer, twelve years. Four of them running LLM
inference infrastructure for a consumer product at scale.

EXPERIENCE

Principal Engineer

2020 – present

Invented Company AB, Gothenburg

- Ran the inference platform behind a consumer product
serving millions of requests a day. Owned capacity,
cost, latency SLOs and the on-call rotation.
- Led the move from a managed API to self-hosted models:
70% lower spend with p99 latency held flat.

Staff Engineer

2013 – 2020

Invented Systems AB, Stockholm

- Distributed systems and service mesh. Took the platform
from three services to sixty without adding an SRE.
