

ADA OKONKWO

Senior Data Engineer · Zurich · ada.okonkwo@example.test

Swiss B permit since 04/2018 · English fluent, German B2 · 3 months notice

SUMMARY

Nine years building data platforms, the last four owning one in production for a regulated insurer. Comfortable being the person paged when the pipeline stops.

EMPLOYMENT

Lead Data Engineer, Invented Insurance AG 05/2021 – present

Own the claims data platform end to end: ingestion, warehouse, lineage and the on-call rotation for it. Rebuilt the nightly load as an incremental one after a full refresh overran its window and delayed reporting by a day; the postmortem and the fix were both mine. Runs on GCP with Terraform and dbt.

Data Engineer, Invented Retail Group 01/2019 – 04/2021

Built the event pipeline behind the loyalty programme. Kafka, BigQuery, and the first tests the team had for a data path.

Analyst Programmer, Invented Consultancy 08/2016 – 12/2018

SQL and reporting for client engagements. First exposure to production.

TOOLS

Python · SQL · dbt · BigQuery · Kafka · Airflow · Terraform · GCP
