

## How do I exit OpenOptics CLI?

```
Ctrl+D
```

or in Mac

```
Command+D
```

## Where is my dashboard?

Open <http://localhost:8001> on your browser

## Why doesn't it work?

Check if you enable port forwarding:

-L8001:0.0.0.0:8001 in ssh or

LocalForward 8001 0.0.0.0:8001 in your host's .ssh/config

Exception: Error creating interface pair (ocs0-eth0,tor0-eth0): RTNETLINK answers: File exists

```
mn -c
```
