SENIOR SOFTWARE ENGINEER

Meet the software engineer who learned the value of TDD from a very special teacher: Murphy's Law. After a memorable SaaS meltdown in production, I learned to test before I deploy. Now, my code works, and my blood pressure thanks me.

EDUCATION

Bachelor of Technology in Computer Science

2010 - 2014

XYZ University, ABC City, India

GPA: 3.5/10 (I was going for 9, but pizza happened)

University Topper in going late

Published Research Paper which 12 people have read, including me

Master of Technology in Artificial Intelligence

2014 - 2016

PQR Institute, DEF City, India

Research Assistant

Filed Patent, Now I Just Need to Remember What It Was For

SKILLS

Languages Go, Come, Python, C++

Libraries Jango, Reaction

Databases OurSQL, PostgreSQL, MangoDB

WORK EXPERIENCE

ABC Corporation, Fake City, India | Software Engineer | 2016 - 2018

- Developed a machine learning model for image classification for cat and not-cat
- Improved search engine performance by 2.18%
- Collaborated on a new feature launch

DEF Startups, ABC City, India | Software Engineer | 2018 - 2020

- Built a real-time analytics dashboard to watching numbers move in real-time
- Enhanced payment gateway reliability from "it usually works" to "it almost always works"
- Launched a new feature with the team in one night and most of tests failed in the morning

PROJECTS

Project Alpha

Python, Django, MySQL

- Developed a web application for e-commerce where you can buy things
- Implemented a secure payment gateway...yes, your money is safe, ig
- Deployed on a cloud platform aka rented computers

Project Beta

Java, Spring, MongoDB

- Created a mobile app for social media because the world needed another one, right?
- Designed a functional chatbot
- Successfully deployed on a cloud platform
