From: Acting Field Officer, OME, Region III

Subject: Royalty matters
DMEA 1 and 1A (Lead-Zinc)
Chief, Consolidated Mining Company
(Chief No. 1 Mine)
Juab and Utah Counties, Utah
Second Amended Contract Ldm-E4

RECEIVED	DATE	FILE
	APR 17 1963	
		600

Reference is made to your memorandum dated March 21, 1963 concerning the area subordinated by the subject Second Amended Contract.

Mr. Bomslo obtained the following information concerning this matter during conversations with the company's secretary, Mr. W. W. Watson, 608 Dooley Bldg., Salt Lake City, Utah, April 8, 1963. Two tracts of the subordinated area are included in a voluminous lease between the Chief Consolidated Mining Company and the Kennecott Mining Corporation. You will be informed within a week or two by Mr. Watson that the Government's rights have been protected as described in the enclosed company's 54th annual report.

The Bergen ore body is being extended northward from the Bergen shaft but to date no ore has been found on the DMEA ground.

CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Washington office pertaining to the Second Amended Contract Idm-E4, Docket DMA-1 and 1A (lead-zinc), dated June 16, 1953, with

Chief Consolidated Mining Company
608 Dooly Building
Salt Lake City, Utah

for the purpose of determining the amount of royalty payable to the U. S. Government on sales of minerals from property referred to as the Chief No. 1 Mine located in Juab and Utah Counties, Utah, during the period July 11, 1956, through February 2, 1960.

A certification of discovery or development was issued on February 17, 1956, and, in accordance with Annex II (attached to Amendment No. 4) of the Second Amended Contract, royalty is payable on all minerals produced from the land described in Article 2 and Exhibit "B" of the Second Amended Contract for a period of 15 years from the date of the Original Contract (June 13, 1951) or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first. A Report of Review dated October 10, 1958, indicated accepted costs under the exploration contract amounting to \$366,626.13 with the Government's contribution being \$174,695.18.

The status of the project, the scope of review, and the reasons therefor are stated on page 2.

This review established no sales subject to the Government's royalty subsequent to the period covered by a prior Report of Royalty Review which found the sales subject to the Government's royalty through July 10, 1956, to be \$2,638,328.74. The royalty account as of July 10, 1956, was:

Total Royalty Payable	\$127,035.90
Total Royalty Paid	<u>127,035.90</u>
Balance of Royalty Due	<u>\$ -0-</u>

As of February 2, 1960, the royalty account of this project was found to be:

Total Royalty Payable	\$127,035.90
Total Royalty Paid	<u>127,035.90</u>
Balance of Royalty Due	<u><u>\$ -0-</u></u>

March 5, 1962

E. D. Talbert, OME Auditor

Idm-E4

Chief Consolidated Mining Company

DMA-1 and 1A

STATUS OF PROJECT, SCOPE OF REVIEW
AND REASONS THEREFOR

The Second Amended Contract, as further amended by the substitution of Annex II for the provisions of Article 6, provides that the Operator, as principal if the producer or as surety if not the producer, shall pay to the Government a percentage royalty on all mineral production from the land described in Article 2 and set forth in Exhibit "B" and a map attached to the contract form. The lands under the contract were owned in fee simple by the Operator at the time the contract was executed.

Exploration work under the contract was suspended on May 4, 1955. A decision to abandon the exploration project, pull the pumps, and allow the lower levels to flood was made by the Operator during September 1955. A Termination Agreement effective October 15, 1955, was executed on January 30, 1956.

All mining operations on the property ceased during the latter part of November 1955. Production from the date of the contract to the cessation of mining amounted to 155,221.914 dry tons of ore, all of which was sold to the United States Smelting, Refining and Mining Company for aggregate proceeds, after allowable deductions, of \$2,638,328.74. These proceeds were proven by audits of the Operator's sales and production accounts and records on August 10 to 13, 1954, July 19 through August 17, 1955, and July 10, 1956. The aggregate findings of these audits are summarized in a Third Royalty Audit Report and Certificate dated August 16, 1956.

The land under this exploration project contract is embraced by tracts included in an August 29, 1956, Lease and Unit Agreement between the Operator and four other companies, as lessors, and the Bear Creek Mining Company, 161 East 42nd Street, New York, N. Y. This agreement, which is effective until September 1, 2006, unless sooner terminated or extended, recognizes the DMA lien and provides that the Government's royalty shall be paid by the Operator or, upon its request, by Bear Creek for the account of the Operator.

Inspections by field representatives and advices from the Operator disclosed no mining operations on the property under the contract from November 1955 through the period covered by this review.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

- (1) The files indicate no mining activity on the property during the period covered by this review;

Idm-B4

Chief Consolidated Mining Company

DMA-1 and 1A

- (2) Sales of all prior production are covered by prior Royalty Audit Reports and Certificates; and
- (3) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible additional royalty which might be disclosed.

Second Amended Contract Idm-E4

As you probably have surmised, this Division is making an effort to "up-date" its royalty audits and reviews. Such effort is being concentrated particularly on those contracts which have not been reviewed or audited within the last three to four years or which have ceased production since the last review or audit.

The last royalty audit on the subject contract covered a period ending July 10, 1956. In order that an "up-dated" Report of Royalty Review may be prepared, your submission of an original and one copy of MME Form 22, Check Sheet of Examining Engineer, will be appreciated.

The Washington files indicate that the last inspection of the property was made on January 20, 1959, and the last date of advice from the Operator was February 2, 1960. I assume, also, that the August 29, 1956, lease agreement with Bear Creek Mining Company is still in effect. Please confirm or correct by appropriate statement under item 8 of the MME Form 22.

Memorandum

To: W. E. King, Executive Officer, BMA Field Team, Region III
From: Supervising Mining Engineer
Subject: Pocket No. BMA-1 and 1A (Lead-silver), Contract No. 24, Central Consolidated Mining Co., Utah and Utah Division, Utah

Reference is made to your memorandum of July 24, 1957, concerning production and royalty figures under the subject contract. Figures appearing in W. E. Young's final engineering report do not coincide with those recorded in your office.

Young has checked his figures with the records in our file and finds substantially the same results as shown in the engineering report. We do not have copies of the annual and third royalty audit certificates. We have no knowledge of production made from the property which has not been reported to your office. It appears, therefore, that the average in the engineering report must result from duplication of figures.

CONTRACT ADMINISTRATION AND REVENUE DIVISION**

THIRD ROYALTY AGENT CERTIFICATE

I have examined the records and sales documents pertaining to the sale of lead-zinc ores for the period August 13, 1955 through July 10, 1956, by

The Utah Consolidated Mining Company
608 Bostley Building,
643 Lake City, Utah

produced from the Utah Consolidated Mine in Juab County, Utah, under the terms of Contract No. 144-14, District No. 144-1 and 1A (Lead and Zinc Ores) dated June 13, 1951.

My examination was made in accordance with generally accepted standards applicable in the circumstances.

The audit established the net sales of lead-zinc ores for this period to be \$110,251.90. Royalty due the United States Government at the contract rates of 1 1/2% to 5% is \$4,119.77.

Prior audits conducted by Donald T. Finch for the periods June 13, 1951 to July 30, 1954, and July 29, 1954 to August 12, 1955, found the sales as of the last date to be \$2,580,077.24, which added to the sales for this period make a total of \$2,630,338.74 as of July 10, 1956. The royalty account as of August 12, 1955 was

Total Royalties Due	\$282,916.13
Total Royalties Paid	158,916.13
Balance of Royalties Due	\$ 0.00

As of July 10, 1956, the royalty account of this project was found to be

Total Royalties Due	\$127,035.90
Total Royalties Paid	127,035.90
Balance of Royalties Due	\$ 0.00

August 16, 1956

Donald T. Finch, Auditor
Donald T. Finch

THIRD ROYALTY AUDIT REPORT

I. INTRODUCTION

On July 10, 1956, an audit was made of the production, sales and royalty accounts and records of

The Chief Consolidated Mining Company
608 Bowley Building,
Salt Lake City, Utah

pertaining to the sale of lead-zinc ores during the period August 13, 1955 through July 10, 1956, produced from the Chief Consolidated Mine located in Juab County, Utah, on which royalties are due the United States Government under the terms of Second Amended Contract IMA-24, Deedlet No. IMA 1 and 1A (Lead and Zinc Ores), dated June 16, 1953, as amended.

The amended contract superseded the original contract dated June 13, 1951 and First Amended Contract dated June 16, 1953. Prior royalty audits covered the period from the date of the original contract through August 12, 1955.

The production and sales records pertaining to this contract are maintained at the Operator's main office in Salt Lake City, Utah.

During the on-site audit Mr. W. W. Watson, Secretary-Treasurer of the Company, and Mr. W. E. Young, Mining Engineer, U.S.B.M., were consulted when necessary.

II. GENERAL INFORMATION

A certification of discovery or development was issued on February 17, 1956. Annex II attached to Amendment No. 4 to the second amended contract provides that if the Government makes a certification of discovery or development, the Operator, as principal, if the Operator is the producer, or as surety if the Operator is not the producer, shall pay to the Government a royalty on all minerals mined or produced from the land described in Article 2 of the contract form for a period of 15 years from the date of the original contract (June 13, 1951) or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first.

Prior royalty audits have been made of this contract covering the periods June 13, 1951 to July 28, 1954, and July 29, 1954 to August 12, 1955, as evidenced by audit reports dated August 23, 1954 and August 22, 1955, prepared by Donald T. Finch, BSEA Auditor. The present audit extends the period covered by audit to July 10, 1956.

A termination agreement has been executed as of January 30, 1956. At the time of this royalty audit the final accepted costs of exploration had, however, not been determined because the liquidation value of items of equipment and materials in which the Government has an equity had not been settled.

CONFIDENTIAL

... ..

... ..

... ..

... ..

... ..

... ..

CONFIDENTIAL

... ..

... ..

... ..

The total cost of exploration before adjustment for terminal liquidation, based on the last MF-104 filed by the Operator, amounts to \$389,383.46, of which \$185,680.73 represents Government participation.

The exploration contract authorized a total cost of \$518,040.71 with Government participation of \$259,020.35. An interim audit for the period ending April 30, 1952 has been made of total costs of \$324,030.81 with Government participation of \$153,342.17 approved.

All production for the period August 13, 1955 through July 10, 1956 subject to INEA royalty was sold to United States Smelting, Refining and Mining Company. The purchaser made royalty payments direct to the INEA office at Denver, Colorado.

Mining operations in the land area described in Article 2 of the contract form ceased the later part of November, 1955. Mr. Watson, Secretary-Treasurer of the operator, advised the Auditor that the operator did not contemplate resumption of production in that area at the present time. He did, however, state that present joint exploration activities of the company with another operator in a contiguous area might subsequently result in the resumption of production subject to INEA royalty at some future date.

III SCOPE OF AUDIT AND FINDINGS

A. Conference with Examining Engineer

A conference with the Examining Engineer (Mr. Young) disclosed the following:

- (a) The operator does not stockpile ore, mine or mill rejects and does not commingle production subject to INEA royalty with exempt production.
- (b) Assay controls in effect are adequate and the manner of disposing of production is considered to give the Government its fair royalty returns.
- (c) Periodic examinations of operations indicate the operator is properly reporting his production of ores subject to INEA royalty.
- (d) The operator does not buy from, or sell to other operators.
- (e) Mr. Young also confirmed the cessation in November, 1955 of production subject to INEA royalty.
- (f) At the time of the audit there was one shipment of "Cleanup" in transit. On July 18, 1956 a copy of U.S. S.R. & M. Co. settlement sheet No. 447 GPU covering this shipment was received by the Executive Officer, INEA Field Team, Region III. This settlement sheet disclosed the shipment consisted of sludge having no value in excess of transportation costs.

B. Audit of Settlement Statements

A considerable amount of pre-audit analysis was accomplished in the DREA office, Region III, Denver, Colorado, prior to the on-site audit. This consisted of a recomputation and tabulation of all detailed settlement sheets issued during the period August 13, 1955 through July 10, 1956.

This tabulated information was reconciled with amounts of royalty receipts indicated by the records of the Regional Finance Officer. These tabulations are filed as part of my audit working papers. A summary analysis of these statements and the results of prior audits is included in section IV of this audit report.

The on-site audit included a comparison and reconciliation of the data compiled during the pre-audit work with the operator's production and sales records in the company's office at Salt Lake City, Utah. The total royalties paid as shown by this and prior audits was also reconciled with the operator's DREA control account in its General Ledger.

IV. CONCLUSIONS

A summary analysis of the operator's production and sales with amounts subject to DREA royalties and royalties paid, segregated by this and prior audit periods follows:

	PERIOD 6/13/51 TO 7/28/54	PERIOD 7/29/54 TO 8/12/55	PERIOD 8/13/55 TO 7/10/56	TOTAL
Gross Weight	128,440,140 lbs.	169,528,760 lbs.	19,205,280 lbs.	317,174,180 lbs.
Dry Weight	125,775,807 lbs.	166,085,640 lbs.	18,582,382 lbs.	310,443,829 lbs.
Tons of Dry Weight	<u>62,887.903</u>	<u>83,042.820</u>	<u>9,291.191</u>	<u>155,221.914</u>
Gross Value Net of Treatment Charges	<u>\$1,315,898.53</u>	<u>\$1,448,386.90</u>	<u>\$121,750.68</u>	<u>\$2,886,036.11</u>
Allowable Deductions				
Railroad Freight	\$103,061.39	\$119,623.06	\$ 10,732.20	\$233,416.65
Fed. Transport. Tax	3,091.84	3,588.90	321.98	7,002.72
Assay Fees	2,415.00	2,562.00	287.00	5,264.00
Umpire Fees	928.00	938.00	158.00	2,024.00
Total Allowable Deductions	<u>\$109,496.23</u>	<u>\$126,711.96</u>	<u>\$11,499.18</u>	<u>\$247,707.37</u>
Net Value	<u>\$1,206,402.30</u>	<u>\$1,321,674.94</u>	<u>\$110,251.50</u>	<u>\$2,638,328.74</u>
Average Value per Dry Ton	\$19.18	\$15.92	\$11.87	\$17.00
Average Royalty Percentage	<u>4.78</u>	<u>4.85</u>	<u>3.74</u>	<u>4.82</u>
Royalties Due	\$58,773.35	\$64,142.78	\$4,119.77	\$127,035.90
Royalties Received	<u>58,773.35</u>	<u>64,142.78</u>	<u>4,119.77</u>	<u>127,035.90</u>
Balance of Royalties Due	<u>\$ 0.00</u>	<u>\$ 0.00</u>	<u>\$ 0.00</u>	<u>\$ 0.00</u>

Note: The last settlement sheet included in the foregoing data was United States Smelting, Refining and Mining Company No. 445 GPU shipped June 18, 1956.

The audit has confirmed the accuracy and propriety of royalty payments received by the Regional Office applicable to ore sales during the period June 13, 1951 through July 10, 1956. It has also determined that all indicated sales during such period have been properly accounted for.

DEFENSE MINERALS EXPLORATION ADMINISTRATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

RECEIVED

SEP - 1955

SECOND ROYALTY AUDIT CERTIFICATE

I have examined the records and sales documents pertaining to the sale of Gold, Silver, Copper, Lead and Zinc ores for the period October 3, 1951 through August 12, 1955, by

The Chief Consolidated Mining Co.

608 Dooley Building

Salt Lake City, Utah

produced from the Chief Consolidated Mine, Juab County, at Eureka, Utah, under the terms of Exploration Contract Idm-E4, Docket Nos. IMA 1 and 1A.

My examination was made in accordance with generally accepted standards applicable in the circumstances.

The audit established the total net sales of Gold, Silver, Copper, Lead and Zinc ores for this period to be \$2,528,077.24. Royalty due the United States Government at the contract rates ranging from 1 1/2% to 5% amounts to \$122,916.13. The royalty paid and balance due are as follows:

Total Royalties Due	\$122,916.13
Total Royalties Received	<u>122,916.13</u>
Balance of Royalties Due	<u>0.00</u>

August 22, 1955

Donald T. Finch
Donald T. Finch, Auditor

SECOND ROYALTY AUDIT REPORT

I. INTRODUCTION

Beginning on July 19, and continuing intermittently through August 17, 1955, an audit of royalty payments received covering the period October 3, 1951 through August 12, 1955, was made of the ore sales documents pertaining to Contract Ida-M, Docket Nos. Ida 1 and 1A, with the

Chief Consolidated Mining Company

608 Dooler Building

Salt Lake City, Utah

covering a project of exploration for lead, zinc, located in Juab County at Bureau, Utah, and generally known as Chief Consolidated Mine.

The production records and ore sales accounts pertaining to this contract are located in the company's office at the above address.

Mr. W. E. Young, Mining Engineer, Salt Lake City Office, United States Bureau of Mines, is the Examining Engineer for this project.

II. GENERAL INFORMATION

At the time of this audit of royalty repayments, the exploration contract had not been completed and the BMA had not issued a Certificate of Recovery. Total cost of exploration, based on the last NF-104 filed by the Operator, amounts to \$369,383.46, of which \$185,680.73 represents Government participation.

The exploration contract authorizes a total cost of \$518,040.71 with Government participation of \$299,020.33. An interim audit for the period ending April 30, 1952, has been made of total costs of \$324,030.81 with Government participation of \$153,342.17, approved.

Gold, Silver, Copper, Lead and Zinc are all involved in the production and sales of ore subject to royalty repayments.

The production area which is subject to royalty repayments is described in Exhibit B of the second Amended Exploration Contract. Production subject to royalty repayments is broadly described as all ores mined north of the Leadville Fault and all ores mined south of the Leadville Fault below the 2,450 foot level with certain minor blocks excluded.

A first royalty audit covering the period October 3, 1951 through July 28, 1954, was made by Donald T. Finch, as shown by audit report dated August 23, 1954. The present audit, therefore, has been limited to ore sales since July 28, 1954.

During the period July 29, 1954 through August 12, 1955, all royalty remittances received by the Executive Officer of the IMA Field Team, Region III, were supported by copies of settlement sheets issued by the purchaser of the ores. The remittances for royalties due were made by the purchaser, which was the United States Smelting, Refining and Mining Company's smelter at Midvale, Utah.

The previous audit disclosed that the Operator produces ore subject to royalty repayments simultaneously with ore that is not subject to royalty repayments, but does not stockpile ores. It also disclosed that the Operator maintains exceptionally complete production and ore sales records and conducts an internal audit of all settlement sheets and bills of lading.

Periodic inspection of mining operations have been made by the Examining Engineer who also has in the past reviewed production records. All ore sold by the Operator to the United States Smelting, Refining and Mining Company was on the basis of a smelter contract. This contract contains very complex formulae, the application of which required between 13,000 and 14,000 involved calculations during the present audit covering the period July 29, 1954 to August 12, 1955. These formulae are not reproduced in this report but are available in the audit working papers.

III. SCOPE OF AUDIT AND FINDINGS

The audit was limited to determining the accuracy and propriety of royalty payments received by the Finance Officer during the period July 29, 1954 through August 12, 1955, and a determination that all indicated sales of ores subject to repayment royalties under the exploration contract and amendments, for which settlement sheets have been released, have been properly accounted for.

The extent of the audit and the findings follow:

A. Conference with the Examining Engineer. U.S.B.M.

At the time of the first royalty audit the Examining Engineer and the Auditor made a joint inspection of the underground and surface operations to observe the methods for segregation of production subject to IMA royalty from other production. Production and sales records and controls maintained at the mine office at Eureka and at the general offices in Salt Lake City were examined.

In lieu of a conference with the Examining Engineer at the time of this Second Royalty Audit, a review was made of his written reports of periodic examinations during the period July 29, 1954 through August 12, 1955, which are on file with the Executive Officer, IMA Field Team, Region III. The matter was also reviewed with the Executive Officer and signed. "Check Sheet of Examining Engineer" dated August 9, 1955, was secured from Mr. Young, Mining Engineer, U.S.B.M. This check sheet discloses that the Operator does not stockpile ore subject to IMA royalties, nor does it stockpile mine or mill rejects. Production subject to IMA royalties is not commingled with exempt production.

The Examining Engineer reports that the Operator does not buy or sell to other operators, and all production subject to IMEA royalties during the period July 29, 1954 through August 12, 1955 was shipped direct to the United States Smelting, Refining and Mining Company, Midvale, Utah.

The engineer considers that assay controls in effect are adequate and the Operator's manner of disposing of production gives the Government its fair royalty returns.

The engineer reports that his periodic examinations of operations indicate the Operator is properly reporting his production of ores subject to IMEA royalties.

B. Audit of Settlement Statements

During the audit detailed and itemized statements of settlement sheet computations and allowable deductions were prepared. A condensed summary of these computations follows:

	PERIOD 10/3/51 to 7/28/54	PERIOD 7/29/54 to 8/12/55	TOTAL
Gross Weight	128,440,140 lbs.	169,528,760 lbs.	297,968,900 lb
Average Percent of Water	2.07 %	2.03 %	2.05 %
Weight of Water	<u>2,664,333 lbs.</u>	<u>3,443,120 lbs.</u>	<u>6,107,453 lb</u>
Net Dry Weight	125,775,807 lbs.	166,085,640 lbs.	291,861,447 lb
Tons of Dry Weight	<u>62,887.903</u>	<u>83,042.820</u>	<u>145,930.723</u>
Gross Value Net of Treatment Charge	\$1,315,898.53	\$1,448,386.90	\$2,764,285.43
Allowable Deductions	<u>109,496.23</u>	<u>126,711.96</u>	<u>236,208.19</u>
Net Value	<u>\$1,206,402.30</u>	<u>\$1,321,674.94</u>	<u>\$2,528,077.24</u>
Average Value Per Dry Ton	\$19.18	\$15.92	\$17.32
Average Royalty Percentage	<u>4.87</u>	<u>4.85</u>	<u>4.86</u>
Royalties Due	\$58,773.35	\$64,142.78	\$122,916.13
Royalties Received	<u>58,773.35</u>	<u>64,142.78</u>	<u>122,916.13</u>
Balance Royalties Due	<u>0.00</u>	<u>0.00</u>	<u>0.00</u>

The complete detailed computations and schedules supporting the foregoing data, which were compiled during the audit, are available in the file of audit working papers. Discussions of this material and degree of confirmation is submitted below:

Gross Weight in Pounds - (297,968,900 lbs.)

Gross Weight in Pounds represents the aggregate total of the totals of wet weight shown by the settlement sheets of the railroad cars of ore in each lot shipment. The addition of total gross weights shown on all settlement sheets issued during the period July 29, 1954 through August 12, 1955 was confirmed during the audit.

Dry Weight in Pounds - (291,861,447 lbs.)

This weight is set out on the settlement sheets and represents the gross weight less pounds of water content. The settlement sheets showed the percent and weight of water content. All computations of net weight, including the application of percent of water content, were recomputed during the audit for the period July 29, 1954 through August 12, 1955.

Dry Weight in Tons - (145,930.723 Tons)

This weight was recomputed during the audit for all settlement sheets issued during the period July 29, 1954 through August 12, 1955.

Gross Value - (\$2,764,285.43)

Gross Value is shown by the settlement sheets. It is determined by applying the smelter schedule formulae to the assay data as shown on the settlement sheets to determine the price paid per ton of ore for each metal: viz Gold, Silver, Copper, Lead and Zinc. To arrive at the gross value per ton, the prices per ton of ore for each metal are totalled and the scheduled treatment charge of \$3.45 per ton is deducted to arrive at a gross value per ton net of treatment charges. Gross value of the settlement sheet lot is determined by multiplying gross value per ton net of treatment charges by the number of dry tons.

All of the foregoing computations were recomputed during the audit for each settlement sheet issued during the period July 29, 1954 through August 12, 1955.

Allowable Deductions - (\$236,208.19)

Allowable deductions consisted of the following items:

	PERIOD 10/3/51 to 7/28/54	PERIOD 7/29/54 to 8/12/55	TOTAL
Railroad Freight	\$103,061.39	\$119,623.06	\$222,684.45
Federal Transportation Tax	3,091.84	3,588.90	6,680.74
Assay Fees	2,415.00	2,562.00	4,977.00
Umpire Fees	938.00	938.00	1,876.00
TOTALS	<u>\$109,406.23</u>	<u>\$126,711.96</u>	<u>\$236,208.19</u>

All charges for freight and transportation charges shown by the settlement sheets issued during the period July 29, 1954 through August 12, 1955 were recomputed during the audit. There were no disallowed deductions for the period under review.

Net Value - (\$2,528,077.24)

This item is not shown on the settlement sheets. It is obtained by deducting the allowable deductions from gross value on each settlement sheet. All computations of this nature for the period July 29, 1954 through August 12, 1955, were computed during the audit.

Net Value per Dry Ton

This item is not shown on the settlement statements. It was necessary to compute it during the audit for all settlement sheets issued during the period July 29, 1954 through August 12, 1955 for use in determining the applicable percentage of royalty.

Royalty Percentage

All royalty percentages applicable to the period July 29, 1954 through August 12, 1955, were determined during the audit by reference to the Exploration Contract and to the net value per dry ton of ore. These royalty percentages ranged from 1½% to 5%.

Royalties Due - (\$122,916.13)

This item is determined by applying the royalty percentage to Net Value. All royalty computations for the period July 29, 1954 through August 12, 1955, were recomputed during the audit.

Royalties Received - (\$122,916.13)

Total Royalties Received, as determined by the audit, was reconciled with the Finance Officer's records as follows:

Total per Audit	\$122,916.13
-----------------	--------------

Total per Finance Officer's Records on August 17, 1955	\$120,406.24
---	--------------

Add:

Items Not Posted

CD 17, dated 8/8/55	\$ 358.57	
CD 18, dated 8/9/55	<u>1,697.88</u>	2,056.45

Items in Transit

Settlement #406	\$385.58	
Settlement #409	<u>67.86</u>	<u>453.44</u>

Total as above	<u>\$122,916.13</u>
----------------	---------------------

Balance of Royalties Due

There was no balance of unpaid royalties due.

Miscellaneous Comment

The complete detailed audit of all settlement sheets issued during the period July 29, 1954 through August 12, 1955 disclosed only one very minor error in ore weight totals which may have been a typographical error. Since only 30% of possible royalty could have been involved, the item has been disregarded in this report.

C. Audit of Operator's Records

Because all ore sales have been reported by the Examining Engineer as having been made to the United States Smelting, Refining and Mining Company, who have made payments direct to the Executive Officer of the DREA Field Team, Region III, and because of completeness of the on-site review reported in the previous audit report, an on-site examination of the Operator's records at this time has been deferred. It is suggested that at the time of the third royalty audit consideration be given to again reviewing the Operator's records.

IV CONCLUSIONS

The audit has confirmed the accuracy and propriety of the royalty payments received by the Finance Officer during the period October 3, 1951 through August 12, 1955. It has also determined that all indicated sales of ores subject to DREA royalties under the Exploration Contract, for which settlement sheets have been released, have been properly accounted for.

Docket No. DMA 1 and 1A

Check One
Yes No

1. (a) Does the Operator stockpile ore subject to royalty repayment? ✓
(b) If so, is segregation and identification procedure adequate?
2. (a) Does Operator commingle production subject to DMEA royalties with exempt production? ✓
(b) If so, do you consider the allocation of the commingled production equitable?
3. (a) Does the Operator stockpile mine or mill rejects (low grade ore, tailing, middlings, etc.) that may have potential value within the royalty payment period? ✓
(b) If so, are adequate records maintained on such material to protect the Government's interest?
4. Do you consider the assay controls in effect are adequate? ✓
5. Do you consider that the manner of disposing of production gives the Government its fair royalty returns? ✓
6. Do your periodic examinations of operations indicate the Operator is properly reporting his production of ores subject to DMEA royalties? ✓
7. Does the Operator buy from or sell to other Operators? ✓
8. Comment on any item 2 (b) to 6 if answer is No.

All production subject to DMEA royalty is shipped direct to U. S. Smelting, Refining and Mining Co., Midvale, Utah.

Re: Royalty Audit Report
The Chief Consolidated Mining Co.
Idm-E4, DMA-1 and 1A

Dear Mr. Finch:

The Second Royalty Audit Certificate and Report covering the referenced project is acceptable and normal distribution is authorized.

For your guidance, however, in future cases of a similar nature, where an actual audit of the Operator's records is not made, it is suggested that your findings be covered by a Report of Royalty Review rather than by a Royalty Audit Report and Certificate. Such a Report of Royalty Review should be supported by a schedule including a summary corresponding to that shown on page 3 of this particular Audit Report.

It is realized that this particular review involved considerably more work than is normally encountered in a routine royalty audit. However, the fact remains that the word "audit" infers that an examination of the Operator's records was included, whereas a "review" means that only the Government's files and records were examined.

It is also noted that in this audit report, as well as the prior one, the period covered was indicated as commencing October 3, 1951. It is suggested that, in the future, both Royalty Reviews and Certificates indicate the date of the contract (in this case June 13, 1951) as the beginning date of the period.

Sincerely yours,

(Signed) E. D. Talbert

DEFENSE MINERALS EXPLORATION ADMINISTRATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION
FIRST ROYALTY AUDIT CERTIFICATE

I have examined the records and sales documents pertaining to the sale of Gold, Silver, Copper, Lead and Zinc Ores for the period October 3, 1951 through July 28, 1954 by

The Chief Consolidated Mining Company
608 Keeley Building
Salt Lake City, Utah

produced from the Chief Consolidated Mine in Juab County at Tureks, Utah, under the terms of Contract IDA-24, Booklets Numbers DWA 1 and 1A.

My examination was made in accordance with generally accepted standards applicable in the circumstances.

The Audit established the total net sales of Gold, Silver, Copper, Lead and Zinc Ores for this period to be \$1,206,402.30. Royalty due the U. S. Government at the contract rates ranging from $\frac{1}{16}$ to 5% after giving effect to recommended waiver of Balance of Royalties due of \$13.13, is \$58,773.35. The royalty paid and balance due are as follows:

Total Royalties Due	\$58,773.35
Total Royalties Received	<u>58,773.35</u>
Balance of Royalties Due	<u>None</u>

Dated: August 23, 1954

Ronald F. Finch
Ronald F. Finch
Auditor

FIRST ROYALTY AUDIT REPORT

1 INTRODUCTION

On August 10 to 13, an audit of royalty payments received covering the period October 3, 1951 through July 28, 1954, was made of the Production records and Ore sales accounts pertaining to Contract Ida-E4, Docket Numbers DMA 1 and 1A, with the

Chief Consolidated Mining Company
608 Dooley Building
Salt Lake City, Utah

covering a project of exploration for Lead, Zinc located in Juab County, at Eureka, Utah, and generally known as Chief Consolidated Mine.

The production records and Ore sales accounts pertaining to this Contract are located in the Company's office at the above address.

During the course of the Audit, the following representatives of Chief Consolidated Mining Company were consulted when necessary:

Mr. W. W. Watson, Secretary-Treasurer
Mr. R. H. Cornwell, Accountant
Mr. Maynard Carter, Chief Clerk at Eureka

Mr. W. E. Young, Mining Engineer, Salt Lake City Office, Bureau of Mines, collaborated in the Audit.

11 GENERAL INFORMATION

At the time of this Audit of royalty repayments, the exploration contract had not been completed and the DMEA had not issued a Certificate of Discovery. Total costs of exploration, based on the last RF-104 filed by the Operator, amount to \$366,397.46, of which \$174,187.73 represents Government participation.

The Exploration Contract authorizes a total cost of \$518,040.71 with Government participation of \$259,020.35. An interim audit for period ending April 30, 1952, has been made of total costs of \$324,030.81 with Government participation of \$153,342.17 approved.

Gold, Silver, Copper, Lead and Zinc are all involved in the production and sales of Ore subject to royalty repayments.

The mine produces ore subject to royalty repayments simultaneously with ore that is not subject to royalty repayments but does not stockpile ores.

The production area which is subject to royalty repayments is described in Exhibit B of the Second Amended Exploration Contract. Production subject to royalty repayments is broadly described as all ore mined north of the Leadville Fault and all ore mined south of the Leadville Fault below the 2,450 foot level with certain minor excluded blocks of ground.

The Audit indicated that ore sales had been limited to two purchases of ore. Ore sales during the period October 3, 1951, to July 30, 1953, were made to the Concentrator Plant at Bauer, Utah, operated by the Combined Metals Reduction Company. Ore sales during the period April 30, 1953, to July 21, 1954, were made to the smelter at Midvale, Utah, operated by the United States Smelting, Refining and Mining Company.

The Executive Officer of the DMEA Field Team, Region IV, has been furnished copies of settlement sheets for each lot of ore purchased.

During the first few months of production subject to royalty repayments, the Chief Consolidated Mining Company transmitted royalty payments by that Company's checks. Thereafter, the ore purchasers have transmitted these royalty payments, with copies of supporting settlement sheets, direct to the Government.

Chief Consolidated Mining Company maintains its general ledger records of ore sales on a cash receipts basis. Shipments are recorded in a combination Ore Sales and Royalty Journal.

The Producer does not co-mingle production subject to royalty repayments with its other production. A producer's representative or "Moocher", (Boyd J. Bernard) on duty at the purchaser's plant, checks all ore shipment weights and collects the samples for Company and Empire Assay.

The Empire Firm is Black & Deason, Assayers.

An internal audit is made by the producer of all settlement sheets and bills of lading.

A general ledger account of royalty repayments is maintained and the totals of this amount were reconciled with the total royalty repayments received by the DMEA Finance Officer, Region IV.

All ore is sold by Chief Consolidated Mining Company under Contracts with the purchasers. The formulae used in determining the purchase price of the various metals contained in the ores were made available to the examiners.

The operator maintains a very complete segregation of ores subject to royalty repayments from other ores. This fact was confirmed by an examination of the producer's records. Prices paid to the operator by ore purchasers are based on complex formulae contractually agreed upon by the operator and the purchasers. These formulae are not set forth in this report but are available in the audit working paper files.

This conference disclosed the following:

V. Conference with the Existing Engineer, U. S. Bureau of Mines

The extent of the audit and the findings follow:

The audit was limited to determining the accuracy and propriety of royalty payments received by the Finance Officer during the period November 20, 1951, to July 28, 1954, and a determination that all indicated sales of ores subject to repayment royalties under the exploration contract and amendments for which settlement sheets had been released, have been properly accounted for.

III SCOPE OF AUDIT AND FINDINGS

A great deal of pre-audit analysis was performed by the auditor at the DWA office. The auditor also accompanied the Engineer on an underground examination to observe the production segregation methods in use.

Prior to this audit, Mr. Young has made periodic mine examinations to determine the producer's system of production segregation was being maintained. He has also examined settlement sheets and applied the purchaser's formulae to the indicated purchase prices. Copies of the ore settlement sheets have also been examined by assistants to the Executive Officer, DWA Field Team, Region IV. The producer maintains very complete production records. The ore is not sorted, but to a large extent is selectively mined. Production subject to royalty repayments is segregated from other production by underground labeling of each mine car of ore produced. Reference is made to special reports by Mr. Young, Mining Engineer, dated March 1, 1954, copy of which was transmitted to the Operating Committee, DWA. This report gives a very complete description of the operator's methods of segregation of production. Prior to this audit, Mr. Young has made periodic mine examinations to determine the producer's system of production segregation was being maintained. He has also examined settlement sheets and applied the purchaser's formulae to the indicated purchase prices. Copies of the ore settlement sheets have also been examined by assistants to the Executive Officer, DWA Field Team, Region IV.

During the current audit only four such negotiations were noted, and these were discussed with Mr. Watson.

Mr. Watson, producer's representative, however, pointed out these contracts provided that the purchaser reserved the right to reject any ores not amenable to processing in the respective purchaser's plant. As a result of these provisions, there are individual instances of negotiated sales that do not conform in every respect with the written contract.

The Examining Engineer considers these formulas and prices are reasonable and equitable.

Examination of settlement sheets during the Audit disclosed that adequate umpire assays were made of ore sales. The assay controls governing ore sales is considered fully adequate by the Examining Engineer. He also considers the Operator's mining operations, ore preparation and sales of ore are being conducted in a reasonably efficient manner to insure an adequate recovery.

Based on the Examining Engineer's observation during periodic physical examinations of operations and an examination of the Operator's income amounts, the Operator did not make any sales of ore subject to repayment royalties to purchasers other than listed in this Audit report.

The Examining Engineer also advised that there was only one other buyer, in addition to the two listed in this Audit report, located in the Operator's shipping area who was equipped to treat the type of ores currently being produced by Chief Consolidated Mining Company and which are subject to royalty repayment. This buyer, which is the International Melting and Refining Company plant at Bole, Utah, is not operating at the present time. There were no sales of ore subject to DMEA royalties to this buyer disclosed by the Audit.

B. Audit of Settlement Statements

During the Audit, a statement of royalty payments received (Schedule 1) was prepared from copies of Settlement sheets received by the Executive Officer, DMEA Field Team, Region IV. This statement is made a part of this report. A discussion of the data and the degree of confirmation follows:

Gross Weight in Pounds

Gross Weight in Pounds represents the total wet weight shown by the settlement sheet of the railroad carloads of ore in the lot shipment. The addition of total gross weights shown on all settlement sheets issued during the period audited was confirmed during the Audit.

Dry Weight in Pounds

This weight is set out on the settlement sheets and represents the gross weight less pounds of water content. The settlement sheets showed the percent and weight of water content. All computations of net weight, including the application of percent of water content, were recomputed during the preparation of the Statement of Royalties Received.

	Sheet	No.	Total
Settlement	Sheet	NO. 07-109	3.75
Settlement	Sheet	NO. 07-135	5.43
Settlement	Sheet	NO. 07-171	3.68
Settlement	Sheet	NO. 07-171	9.54
			<u>22.50</u>

Combined Water & Reduction Co.

Reductions disallowed totaled \$22.50. These items reported
entered flight overcharges as follows:

SECRET

Ballard Freight including 3%	\$106,159.23
Federal Transportation Taxes	2,408.00
Control and Assay Fees	928.00
Unpaid Fees	7.00
Outstanding	52° 56' 60" E
Total Allowed Deductions	107° 49' 30" E

Deductions allowed for the settlement sheet listed on schedule No. 1 amounted to \$109,496.23. These deductions were for transportation charges, army, navy, supply, etc. paid by the purchaser and listed on the settlement sheet. All charges for freight were reconstructed by the Engineer or the Auditor for all settlement sheets listed on schedule No. 1. Analysis of allowed deductions follows:

~~SECRETARY GENERAL~~

Gross value is shown by the settlement sheets. It was determined by applying the contract schedule formulae to the assay data as shown on the settlement sheets to determine the prices paid per ton of ore for each metal, viz. gold, silver, copper, lead and zinc. To arrive at the gross value per ton, the prices for each metal were totaled and the scheduled treatment charge was deducted to arrive at a gross value per ton net of treatment charges. Gross value of the lot was determined by multiplying gross value per ton net of treatment charges by number of dry tons. The foregoing computations were recomputed either by the Engineer or the Auditor for all settlement sheets shown on schedule No. 1.

REFERENCES

This report was researched in every case during the period - and the statement of Royalties received.

END OF TEST

The foregoing overcharges were discussed with Mr. Kasteen, Secretary-Treasurer of the Operator, who advised he would file a claim with the purchaser and would account to the Government for any royalty due. (See comments below under Royalties Due).

Net Value

This item is not shown on the settlement sheets. It is obtained by deducting the allowable deductions from gross value. All computations of this nature shown on Schedule No. 1 were computed during the Audit.

Net Value Per Dry Ton

This item is not shown on the settlement sheets. It was computed during the Audit and was used in determining the applicable percentage of royalty.

Royalty Percentage

All royalty percentages shown on Schedule No. 1 were determined during the Audit by reference to the Exploration Contract and to the net value per dry ton of ore. These ranged from 1 1/2% to 5%.

Royalty Due

This item is determined by applying the Royalty Percentage to Net Value. All entries of Royalties Due shown on Schedule No. 1 were recomputed during the preparation of the Schedule.

Royalties Received

The individual amounts were entered on Schedule No. 1 from the settlement sheets. The total royalties received of \$58,773.35 was confirmed by reference to the records of the Finance Officer, Region IV.

Balance of Royalties Due

These items were determined by subtracting royalties received from Royalties Due. Analysis of this balance of \$13.13 follows:

Combined Metals Settlement Sheets

GP-109, 5% of Disallowed Freight of \$3.75,		\$.19
Gr-135, Royalty Due		\$105.77
Original payment	\$118.74	
Less: Adjustment set off on G&U #18 of U.S.S.A. & M. Co.	<u>13.19</u>	
Net Payment Received		<u>105.55</u>
Balance Due, (4% of Disallowed Freight overcharge of \$5.43)		.22

Gr-140, Royalty Due		\$ 94.23
Original payment	\$117.54	
Less: Adjustment set off on Settlement Sheet No. G&U #18	<u>13.44</u>	
Net Payment Received		<u>94.10</u>
Balance Due, 3% of Freight overcharge of \$3.68		.13

Gr-141, Royalty Due		\$ 85.85
Original payment	\$ 85.51	
Less: Adjustment set off on Settlement Sheet No. G&U #18	<u>12.21</u>	
Net Payment Received		<u>73.30</u>
Balance Due, 3% of disallowed Freight overcharge of \$9.54	.34	
* 1% of \$2,443.17	<u>12.21</u>	\$12.55

Four settlement sheets with decimal variations of 1/4 each (disregard)		.04
Total Balance of Royalties Due		<u>** \$13.13</u>

* adjustment for the disallowance of Freight overcharge of \$9.54 changed the net value per dry ton and increased the royalty percentage from 3% to 3 3/4%.

** See Insert Page 7A.

C. Audit of Operator's Records

In addition to the above confirmations, a review of the Operator's records and methods of internal check, or audit of ore production and sales as described below was made.

At the Mine Office, Eureka, Utah

It was determined the Chief Mine Clerk reconciled daily ore production which is compiled from three independent reporting sources in the mine. Segregation of production subject to 100% royalty from other ores has been previously described in this report.

During the on-site audit, the "freight over charge" (see Page 5 this audit report) were discussed with Mr. Watson by the Engineer and the Auditor. Mr. Watson rechecked the audit computations and at that time concurred with them. Subsequent to the on-site audit, Mr. Watson addressed a letter to the Executive Officer, Mine Field Team, Region IV, enclosing a letter from the Combined Metals Reduction Company. This correspondence, copies of which are attached, indicate the ore purchaser and the operator do not at this time consider any freight over charges existed, and that there are no additional amounts due the operator or the government for royalties due. While there is some indication the computation of Freight Charges varied from the position outlined in correspondence referred to, it is also recognized the Ore Sales Contracts were subject to negotiation in the case of individual sales. (See 1st Paragraph Page 3 of this report).

It is therefore recommended the indicated balance of royalties due be waived. The Schedule 1 has been adjusted to reflect this recommendation and the Audit Certificate does not show any Balance of Royalties Due.

Railroad Bills of lading, records and methods of preparation were reviewed in detail.

The daily reports, preliminary assay control methods and production reports were scanned. These reports are all transmitted to the Salt Lake City Accounting Office of the Operator.

The system in use at the mine office to control proper accounting for production and sales is considered very complete by the Auditor.

At the Accounting Office, Salt Lake City, Utah

It was determined that the Operator made a complete detailed check of all ore shipments and settlement sheets. The Ore Sales and Royalties Paid Journal was scanned and limited test checks were made to determine that methods of internal checks were functioning.

An analysis of the General ledger Accounts disclosed the following 1954 royalty payments:

Year 1951	\$ 411.74	
Year 1952	14,913.45	
Year 1953	21,599.32	
Year 1954 thru June	21,528.98	
Settlement Sheet, 38		
dated July 21,		
1954 not posted	<u>220.65</u>	
Total Royalty Payments		<u>\$58,773.35</u>

A similar analysis of the Finance Officer's Ledger showed the following:

Finance Royalties received per Ledger	\$58,552.50	
add Settlement Sheet		
dated 38 from U.S.M.A.		
U.S. Co. not posted	<u>220.65</u>	
Total Received by Finance Officer, July 28, 1954		<u>\$58,773.35</u>

In view of the positive reconciliation of the Operator's records with the Finance Officer's records, and the Operator's methods of internal audit and control of ore sales and production, further examination of the Operator's records was considered unnecessary.

IV CONCLUSIONS

A summary analysis of sales of ore subject to 1954 royalties by Chief Consolidated Mining Company, prepared from Schedule No. 1 shows the following:

PURCHASES OF ORE

	<u>Combined Metals Reduction Co.</u>	<u>United States Smelting-Refining & Mining Co.</u>	<u>Totals</u>
Gross Weight	37,974,200 lbs.	90,465,940 lbs.	128,440,140 lbs.
Average Percent of Water	1.74 %	2.21 %	2.07 %
Weight of Water	661,090 lbs.	2,003,243 lbs.	2,664,333 lbs.
Net Dry Weight	37,313,110 lbs.	88,462,697 lbs.	125,775,807 lbs.
Tons of Dry Weight	18,656.555 Tons	44,231.348 Tons	62,887.903 Tons
Gross Value Net of Treatment Charge	\$475,837.81	\$839,060.72	\$1,315,898.53
Allowable Reductions	33,598.17	75,898.06	109,496.23
Net Value	<u>\$443,239.64</u>	<u>\$763,162.66</u>	<u>\$1,206,402.30</u>
Average Value per Ton (Dry Weight)	\$ 23.76	\$ 17.25	\$ 19.18
Average Royalty Percentage	4.94 %	4.83 %	4.87 %
Royalties Due	\$ 21,913.32	\$ 36,873.10	\$ 58,786.42
Royalties Received	21,900.19	36,873.10	58,773.29
Balance of Royalties Due	* \$ 13.13	—	\$ 13.13

* It is recommended Balance of Royalties Due be waived. (See Comments page 7).

The Audit has confirmed the accuracy and propriety of the royalty payments received by the Finance Officer during the period October 3, 1951, through July 23, 1954. It has also determined that all indicated sales of ores subject to DASA Royalties under the Exploration Contract, for which settlement sheets have been released, have been properly accounted for except for the balance due of \$13.13 set forth in the above tabulation and as detailed on the attached Schedule No. 1.

C O P Y

CHIEF CONSOLIDATED MINING COMPANY

608 DOCKY BUILDING

SALT LAKE CITY, UTAH

August 26, 1934

Mr. W. B. King, Executive Officer
D.M.E.A. Field Team, Region IV
224 New Customhouse
Denver, Colorado

Dear Mr. King:

Recently an auditor from your Denver office called attention to four settlements made on ore shipped by us to the Combined Metals Reduction Company in which the Government was entitled to a royalty, and in which the auditor alleged certain discrepancies in freight deductions.

We referred this matter to the Combined Metals Reduction Company and enclose a letter from them in reply which, I believe, you will find self-explanatory.

Yours very truly

/s/ W. W. Latson
Secretary-Treasurer

COMBINED METALS REDUCTION COMPANY

P. O. Box 150

Salt Lake City 10, Utah

August 24, 1954

Mr. W. W. Watson, Secretary-Treasurer
Chief Consolidated Mining Co.
608 Deely Building
Salt Lake City, Utah

Dear Mr. Watson:

Please refer to your letter of August 17, 1954, wherein you list four lots in which government auditer alleged excess freight deductions have been taken.

In each of the four lots in question freight was paid on minimum weight. On lot 109-82 minimum weight is 40,000 pounds and on the other three lots 100,000 pounds. Therefore the royalty as set up on lots and paid by us to R.M.E.A. is correct.

Yours very truly,

/s/ H. E. Swanson

Chief Clerk
Ore Settlement Department

Mr. Jay L. Chambers, Chief
Contract Administration and Audit Division
Defense Minerals Exploration Administration
Washington 25, D. C.

Dear Mr. Chambers:

Enclosed are 3 copies with audit certificates of the First Royalty Audit for the subject contract.

Your attention is directed to page 7(a) and referenced copies of correspondence. This matter did not come to my attention until my return from Idaho. At that time the typing of Schedule No. 1 had been practically completed. It would have required approximately an additional week's stenographic time to rewrite Schedule No. 1 to reflect the indicated changes. In addition, I am of the opinion the present presentation reflects the actual conditions which may be of value on follow-up audits.

The completion of this report has been delayed because of shortage of stenographic help and of large typewriter equipment.

Release of the report is being deferred for your approval.

Sincerely yours,

Donald T. Finch

Re: Ida-34, DMA-1 and 1A
Chief Consolidated Mining Co.

Dear Mr. Finch:

Receipt is acknowledged of three copies of the First Royalty Audit Report and Certificate, covering the referenced Exploration Project Contract, as submitted with your letter of September 21, 1954.

This Report and Certificate are accepted and normal distribution may be effected.

Since you submitted three copies each of the Report and Certificate and only two copies of the Report are required for Washington distribution, I am returning herewith the extra copy of the Report. Possibly you may need it for the Regional distribution.

Sincerely yours,

(Signed) J. L. Chambers

July 14, 1954

Mr. Jay L. Chambers, Chief
Contract Administration & Audit Div.
DMEA -- Interior Building
Washington 25, D. C.

Dear Mr. Chambers:

Enclosed is a copy of a letter to the Secretary of the Operating Committee from the Executive Officer, DMEA Field Team, Region IV.

Since the matter will no doubt be discussed with you, I am furnishing you some additional background information.

I have started the pre-audit analysis of the Royalty Payments received in connection with Contract Idm-E4 -- Chief Consolidated Mining Company, in order that the preparation of the Royalty Audit Report will be expedited when the Royalty Audit Program is crystallized. This pre-audit analysis is not interfering with Exploration Audit work, which is substantially current in this region.

When the situation outlined in Mr. King's letter was discovered the question was raised concerning the customary mining practice in regard to minor differences of this nature. Mr. King felt the matter should be passed on by the Operating Committee in the interest of establishing a uniform standard for such cases.

So far in the present pre-audit analysis a recomputation of the metallurgical data on 50% of the settlement sheets examined has not disclosed anything but minimal differences. In my opinion the few differences discovered do not justify a recomputation of the metallurgical data on 100% of the settlement sheets. Of course, if any material amount of discrepancy is uncovered it is assumed that appropriate action would be in order.

Yours very truly,

Donald T. Finch
Donald T. Finch,
Auditor

July 13, 1954

Memorandum

To: Secretary to the Operating Committee, DMEA
From: Executive Officer, DMEA Field Team, Region IV
Subject: Audit of Royalty Payments

Donald T. Finch, Auditor, has been examining the settlement sheets covering shipments of ore on which royalty has been paid the DMEA under the terms of Contract Idm-E4, Chief Consolidated Mining Company.

Some minor errors have been noted in these settlement sheets. A summary of the calculations on Lot GP-3 as submitted by the Combined Metals Reduction Company, and as calculated by Finch, is as follows:

10/3/51 - %Zn. $(\frac{9.6+9.6+10.0+9.9}{4}) = 9.775 - \text{NsZN}.45 = 9.325$
-1.8
= 7.525
x 1.92 = \$14.448 per ton.

Combined Metals showed as $9.75 - .45 = 9.30 - 1.8 = 7.50 \times 1.92$
= \$14.400 per Ton.

Correct Value per Ton Zn =	14.448
Combined Metals settled at	<u>14.400</u>
Difference	.048 per Ton

Shipment $54.932 \times .048 = \$2.64$ Underpayment
 $\$2.64 \times 5\% = 13$ cents Amount of Royalty payment short.

In this case, Finch determined there is a difference of \$.048 per ton, or a total underpayment of \$2.64 on the total shipment. The amount of royalty involved would be 13 cents. The shipper evidently accepted the ore buyer's calculations as correct. Should the DMEA question the value of the ore as determined by the ore buyer if it is accepted by the shipper?

Re: Docket No. 11A-1 and 1A (Lead-Zinc)
 Utah Consolidated Mining Company
 Chief No. 1 Mine
 Utah and Utah Counties, Utah
 Second Amended Contract No. 1-11A-11

Dear Mr. King:

We have your July 13 memorandum referring to audits of royalty payments.

It is our opinion that in instances such as the one you cite, where an apparent discrepancy is of a very minor nature, the purchaser's figures should prevail. However, if you should note instances wherein the sums involved were of a substantial nature, you should first call the matter to the attention of the operator, who would certainly be glad to learn of them and who would undoubtedly promptly put in his claim for an adjustment. Naturally any settlement sheets covering such an adjustment would also have to note the proper royalty deduction.

Sincerely yours,

George C. Selfridge

March 1, 1954

Mr. Cecil Fitch Jr.,
Vice President and General Manager
Chief Consolidated Mining Co.
608 Dooley Bldg., Salt Lake City, Utah

Re: DMEA Docket 1 & 1A (Lead-Zinc)
Contract Idm-E4, Chief Consolidated
Mining Company-Royalty Payments

Dear Mr. Fitch:

Settlement sheets showing correction of royalty due the U. S. Government for Lots 84 GPU to 91 GPU inclusive and check No. 98579 in the amount of \$49.48 has been received from the American Smelting, Refining and Mining Company.

Original settlement sheet for Lot 80 GPU has charges for freight calculated at \$1.56 per ton whereas correction sheet for this same lot uses a freight rate of \$1.71 per ton. We believe the \$1.71 rate to be in error as all other sheets are calculated using a freight rate of \$1.56.

Royalty on the difference between the smelter values of the original and corrected sheets (\$102.19) at 5 percent equals \$5.11. As \$3.11 difference has been paid on this shipment of ore by the smelter, there remains a balance of \$2.00 still due. Please make your check payable to the Treasurer of the United States and send to W. H. King, Executive Officer, DMEA, Region IV, Room 224, New Customhouse, Denver 2, Colorado.

If you prefer, you may have American Smelting, Refining and Mining Company issue another correcting settlement sheet and make payment for the balance due.

Very truly yours,

W. H. King

Dear Mr. Chambers:

Reference is made to your letter dated
March 17, 1954.

The records of this office indicate that
Schedule of Collections No. DMA-54-C-99 lists a royalty
repayment by the Chief Consolidated Mining Company of
\$355.86. The total amount of the schedule also indicates
the amount of this payment to be \$355.86.

Memorandum

To: T. A. Christensen
From: Executive Officer, DMEA Field Team, Region IV
Subject: DMEA Docket 1 & 1A (Lead-Zinc), Contract Idm-E4, Chief Consolidated Mining Company, Juab and Utah Counties, Utah

Reference is made to memorandum dated January 20, 1954 to Clarence A. Fredell, Chairman Operating Committee, Emergency Procurement Service, General Service Administration from J. H. East, Jr., Regional Director, Region IV, a copy of which was furnished to your office.

Regarding the royalty payment in the amount of \$6.22 applicable to Lot No. DMPA-Dev. 1 GPU pertaining to ore shipped by the Chief Consolidated Mining Company, we have been advised that this royalty payment is applicable to repayment of expenditures under the subject contract. Therefore, this amount \$6.22, which has been held in a separate suspense account is to be transferred as a credit to Contract Idm-E4.

Enclosed is your copy of settlement sheet pertaining to this ore shipment.
